PRMS

Things getting sticky?
Simplify with Automated Data Collection with PRMS
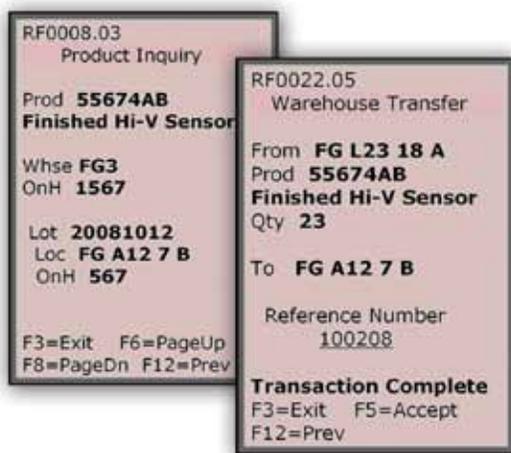

PRMS Automated Data Collection

Accuracy

Properly barcoded parts, lots and locations provide for accurate data entry and scanning into PRMS. With a scan of a barcoded field, there will be no occurrences of transposing numbers or keying of wrong numbers. In an RF environment, there is less risk of human error because of real-time validation.

Timeliness

The value of timely data in the system provides increased levels of information in the hands of the people who need that knowledge.

Accountability

With proper portable computer sign-in procedures, users are tracked to the actual transactions as they occur in the warehouse. Proper supervisor authorization is needed to handle override situations. This makes it easier to pinpoint any areas of concern where a higher than acceptable number of transaction errors may occur.

Workflow

The simplification of the scanning operation is critical to the business function. It is all about workflow. Our RF programs are built to emulate the workflow of the actual business process, while updating the PRMS database in the background, using the existing business rules built into the PRMS. The existing PRMS screens were never created to emulate the workflow of the operation; they were designed as a manual batch process after the actual work had taken place. That is where most of the productivity is gained in the RF and bar code implementation. As long as a proper workflow is designed into the RF programs, the data is collected at the point of creation and there is an efficient update of the PRMS database in real time.

Common RF-enabled PRMS Programs

IN0022	Warehouse Transfers		IN0650	Cycle Count/ Physical Inventory
PO0410	Purchase Receipts		OB01XX	Shipment Confirmation
PO0420	Disposition Update		SF0050	Shop Floor Material Transactions
SF0320	Shop Floor Production/Labor Entry		RO0410	Replenishment Order Receipts
IN0021	Inventory Adjustments		RO0290	Replenishment Order Shipments
IN0008	Product Inquiry			

The Datanational Advantage

Our proven project methodology has been highly successful in our PRMS Automated Data Collection projects. Our long-term experience with PRMS and our hands-on approach with critical projects has dictated the development and growth of our company. These factors have directly contributed to our position toward selfless dedication to our customers and our ability to maintain long-term business relationships with them. Contact us to discuss your automated data collection needs.
